Subject: FW: TRI PFAS Search

Not sure how much help Anthony's suggestion is. **Ex. 5 Deliberative Process (DP)** spreadsheet with some listed with components and others not. For example:

Poly(difluoromethylene), alpha-chloro-omega-(2,2-dichloro-1,1,2-trifluoroethyl)- [This doesn't tell you what the starting materials were]

1-Propene, 1,1,2,3,3,3-hexafluoro-, polymer with 1-bromo-1,2,2-trifluoroethene, 1,1-difluoroethene and 1,1,2,2-tetrafluoroethene [This one shows 3 PFAS components, however these are very short chains (just 2 carbons) but I guess they are technically PFAS.]

For the (O) requirement:

"(O) a perfluoroalkyl and polyfluoroalkyl substance or class of perfluoroalkyl or polyfluoroalkyl substances other than the chemicals described in subparagraphs (A) through (N) that is used to manufacture fluorinated polymers, as determined by the Administrator."

Hi Antony,

Would you know of a way to identify all PFAS used to manufacture fluorinated polymers? The NDAA requires us to evaluate:

"(O) a perfluoroalkyl and polyfluoroalkyl substance or class of perfluoroalkyl or polyfluoroalkyl substances other than the chemicals described in subparagraphs (A) through (N) that is used to manufacture fluorinated polymers, as determined by the Administrator."

Thanks.
Dan

Dan,
Please find my comments inserted below...apologies for the delayed response but I have just returned from a three day trip to the West Coast

Subject: TRI PFAS Search

Hi Antony,

We have another PFAS search that you might be able to help us with. The NDAA requires us to evaluate the following PFAS for addition to the TRI list:

"(N) each perfluoroalkyl or polyfluoroalkyl substance or class of perfluoroalkyl or polyfluoroalkyl substances for which a method to measure levels in drinking water has been validated by the Administrator"

We were provided the attached list of chemicals that are covered by test methods 533 and 537.1.

Ex. 5 Deliberative Process (DP)

Any help much appreciated.

Thanks.
Dan
